

Lounge

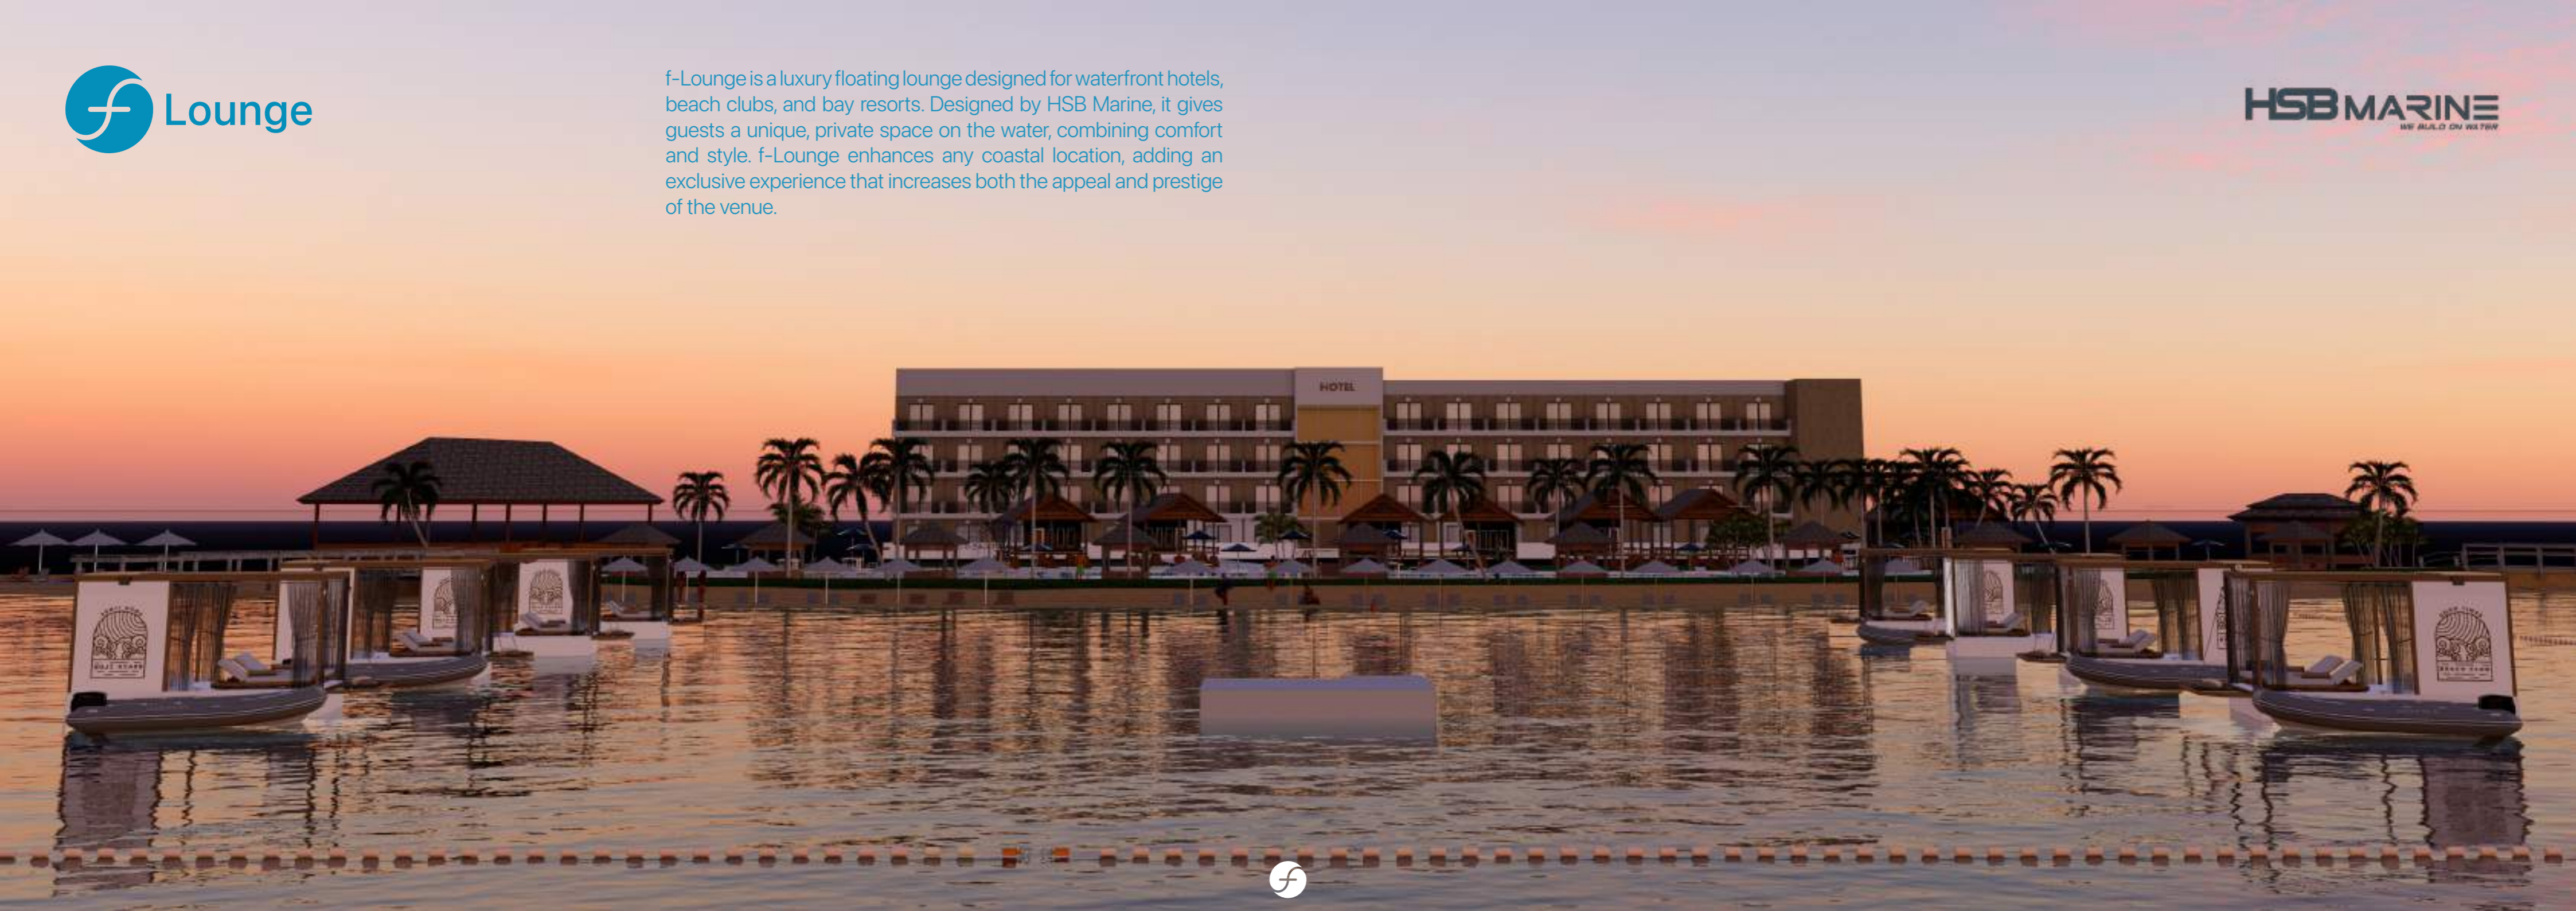

by HSB MARINE®

f-Lounge is a luxury floating lounge designed for waterfront hotels, beach clubs, and bay resorts. Designed by HSB Marine, it gives guests a unique, private space on the water, combining comfort and style. f-Lounge enhances any coastal location, adding an exclusive experience that increases both the appeal and prestige of the venue.

Space (m²) 3.9

Mooring

Our f-Lounge mooring system uses a Danforth Anchor, ideal for strong hold on sandy seabeds. The anchor connects to galvanized steel for durability and rust resistance, followed by a polyester rope attaching directly to the platform. This setup ensures a secure, flexible, and long-lasting connection, perfect for a stable floating experience.

An aerial photograph of a tropical beach. The foreground shows a sandy beach with a curved line of white lounge chairs and umbrellas. In the middle ground, the turquoise water contains several white motorboats and people swimming. The background is a vast expanse of clear, greenish-blue water. The overall scene is bright and sunny.
